**AMENDMENTS TO THE CLAIMS**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (Currently Amended) A method of operating a mobile terminal having first and second communication interfaces, the method comprising the steps of:
  - (a) receiving a first component of a document over a first communication channel via the first communication interface;
  - (b) receiving a second component of the document over a second communication channel via the second communication interface;
  - (c) displaying the first component of the document before completion of the receipt of the second component of the document; and
  - (ed) combining the first and second components of the document at the mobile terminal; and
  - ~~(d) displaying the first component of the document before completion of the receipt of the second component of the document.~~
2. (Original) The method as recited in claim 1, wherein:
  - (a) the first communication channel comprises a first bandwidth; and
  - (b) the second communication channel comprises a second bandwidth greater than the first bandwidth.
3. (Withdrawn) The method as recited in claim 1, wherein:
  - (a) the first communication channel having a first connection cost; and
  - (b) the second communication channel having a second connection cost less than the first connection cost.
4. (Withdrawn) The method as recited in claim 1, wherein:

- (a) the first communication channel comprises a wireless communication channel; and
  - (b) the second communication channel comprises a wired communication channel.
- 5. (Withdrawn) The method as recited in claim 1, wherein:
  - (a) the first communication channel comprises a connection to the Internet; and
  - (b) the second communication channel comprises a connection to a target computer.
- 6. (Withdrawn) The method as recited in claim 1, wherein:
  - (a) the first component of the document comprises a body of an email; and
  - (b) the second component of the document comprises an attachment to the email.
- 7. (Withdrawn) The method as recited in claim 1, wherein:
  - (a) the first component of the document comprises a text of a web page; and
  - (b) the second component of the document comprises images of a web page.
- 8. (Withdrawn) The method as recited in claim 1, wherein:
  - (a) the first component of the document comprises a text of a word processing document; and
  - (b) the second component of the document comprises images of the word processing document.
- 9. (Withdrawn) The method as recited in claim 1, wherein:
  - (a) the first component of the document is received during a remote synchronization session; and

11. (Original) The method as recited in claim 1, wherein:

(a) the first component of the document is received during a first synchronization session; and

(b) the second component of the document is received during a second synchronization session.

12-21. (Canceled)

22. (Currently Amended) A mobile terminal comprising:

(a) a screen;

(b) a local memory; and

(c) first and second communication interfaces; and

(ed) a terminal controller for:

receiving a first component of a document over a first communication channel via the first communication interface;

receiving a second component of the document over a second communication channel via the second communication interface;

displaying the first component of the document before completion of the receipt of the second component of the document; and

combining the first and second components of the document at the mobile terminal; and

~~displaying the first component of the document before completion of the receipt of the second component of the document.~~

23. (Original) The mobile terminal as recited in claim 22, wherein:

- (a) the first communication channel comprises a first bandwidth; and
  - (b) the second communication channel comprises a second bandwidth greater than the first bandwidth.
24. (Withdrawn) The mobile terminal as recited in claim 22, wherein:
- (a) the first communication channel having a first connection cost; and
  - (b) the second communication channel having a second connection cost less than the first connection cost.
25. (Withdrawn) The mobile terminal as recited in claim 22, wherein:
- (a) the first communication channel comprises a wireless communication channel; and
  - (b) the second communication channel comprises a wired communication channel.
26. (Withdrawn) The mobile terminal as recited in claim 22, wherein:
- (a) the first communication channel comprises a connection to the Internet; and
  - (b) the second communication channel comprises a connection to a target computer.
27. (Withdrawn) The mobile terminal as recited in claim 22, wherein:
- (a) the first component of the document comprises a body of an email; and
  - (b) the second component of the document comprises an attachment to the email.
28. (Withdrawn) The mobile terminal as recited in claim 22, wherein:
- (a) the first component of the document comprises a text of a web page; and
  - (b) the second component of the document comprises images of a web page.

29. (Withdrawn) The mobile terminal as recited in claim 22, wherein:
- (a) the first component of the document comprises a text of a word processing document; and
  - (b) the second component of the document comprises images of the word processing document.
30. (Withdrawn) The mobile terminal as recited in claim 22, wherein:
- (a) the first component of the document is received during a remote synchronization session; and
  - (b) the second component of the document is received during a local synchronization session.
31. (Canceled)
32. (Original) The mobile terminal as recited in claim 22, wherein:
- (a) the first component of the document is received during a first synchronization session; and
  - (b) the second component of the document is received during a second synchronization session.
- 33-42. (Canceled)
43. (Currently Amended) A computer program embodied on a computer readable storage medium for use in a mobile terminal having first and second communication interfaces, the computer program comprising code segments for:
- (a) receiving a first component of a document over a first communication channel via the first communication interface;
  - (b) receiving a second component of the document over a second communication channel via the second communication interface;
